SUMMARY

Full-stack .NET developer with professional experience building and maintaining enterprise applications using .NET, ABP Framework, Blazor Server, Entity Framework Core, and SQL Server. Experienced in REST API development, localized user interfaces, authentication and authorization, real-time communication, background processing, and layered DDD applications.

TECHNICAL SKILLS

Languages: C#, SQL, JavaScript, C++

Backend: .NET, ASP.NET Core Web API, ASP.NET Core MVC, ABP Framework, REST APIs, SignalR

Frontend: Angular, Blazor Server, Razor Components, DevExpress, Bootstrap 5, HTML5, CSS3

Data: Entity Framework Core, LINQ, SQL Server

Architecture & Security: DDD, Clean Architecture, SOLID, JWT, ASP.NET Identity, RBAC

Tools: Git, GitHub, Docker, Postman, Swagger/OpenAPI

EXPERIENCE

Full Stack .NET Developer

Domain Network Trade (DNT) - Saudi Arabia | Nov 2025 – Present

- Maintain and extend a layered DDD monolith built with .NET and ABP Framework while working within legacy-code and database constraints.
- Build localized, responsive enterprise interfaces using Blazor Server, Bootstrap, and DevExpress components.
- Develop application services and data-access flows using Entity Framework Core, AutoMapper, and structured DTOs across multiple application layers.
- Implement real-time communication with SignalR, background processing, and secure file-management features.

Full Stack .NET Development Intern

Information Technology Institute (ITI) | Apr 2025 - Sep 2025

- Built REST APIs with ASP.NET Core Web API using structured routing, DTOs, and model validation.
- Implemented SQL Server persistence with Entity Framework Core Code First and wrote LINQ queries
- Secured API endpoints with JWT authentication and role-based authorization using ASP.NET Identity.

Software Development Fundamentals Intern

Information Technology Institute (ITI) | Nov 2024 - Mar 2025

- Developed C++ programs using OOP, pointers, data structures, algorithms, and problem-solving techniques.
- Built browser-based exercises using HTML5, CSS3, JavaScript, Bootstrap 5, and JSON Server.

Projects

Enterprise Competition Management System

.NET, ABP Framework, Blazor Server, EF Core, SQL Server, Blazorise

- Enhanced and extended an existing enterprise competition management system by implementing new features and improving core business workflows.
- Developed and enhanced features for competition tracking, document management, responsible-user assignment, and deadline monitoring.
- Developed features within an existing layered DDD Architecture while maintaining compatibility with the legacy codebase and database structure.

Utility Meter Management & Billing System

.NET, ABP Framework, Blazor Server, EF Core, SQL Server, DevExpress

- Developed a layered DDD application for managing buildings, units, clients, electricity/water/gas meters, readings, contracts, rates, bills, and payments.
- Implemented an interactive dashboard that aggregates consumption and payment data using charts and a location map, with navigation to meter-reading details.
- Built role-based permissions, Arabic/English localization, responsive Blazor interfaces, and periodic background workers for contract-status and yearly-rate maintenance.

Online Bookstore & Order Management Platform

ASP.NET Core MVC, EF Core, SQL Server, ASP.NET Core Identity, Bootstrap, JavaScript

- Built a full-stack bookstore supporting product browsing, persistent shopping carts, quantity-based pricing, checkout, and order management.
- Integrated Stripe Checkout for card payments and implemented a delayed-payment workflow for company customers with order and payment status tracking.
- Developed management modules for products, categories, companies, and orders using image uploads, ASP.NET Core Identity, and Repository with Unit of Work patterns.

EDUCATION

Bachelor of Laws | Tanta University | 2019 – 2022

LANGUAGES & ADDITIONAL INFORMATION

Arabic: Native | English: Professional Working Proficiency | Military service completed: Jun 2024
